

WOMT Meeting Decision 12/18/2007

The Department of Fish and Game completed the December Fall Midwater Trawl Survey. Based on the results of the survey, WOMT determined that some adult delta smelt were upstream of the Sacramento/San Joaquin confluence and recommended the USBR implement, as soon as practicable, the Wanger Order I.B.2., which is to increase sampling at the Jones Pumping Plant to a minimum of 25% of the time.
