

Final Summary for the WOMT meeting on May 26, 2009

The draft USFWS' determination for a 14-day average OMR is -2,000 cfs pending further discussions with Agencies' Directors. The USFWS proposes that should May's expanded salvage concern level of 299 be reached, then the SWG and WOMT shall reconvene and re-evaluate based upon updated information.

DFG determined that no additional action is needed for the protection of Longfin smelt.

\*\*\* UPDATE \*\*\*

The Agencies' Directors met and agreed on a 14-day average OMR flow of -1500 cfs through the end of the month (with the 5-day average within 25% of that value). The combined exports at this time are at 1,500 cfs but may change based on various conditions.
