

WOMT Summary for September 28, 2010

The WOMT Agencies met and discussed the following:

Due to the Project Agencies' ongoing water quality concerns (i.e. 250 mg/l Chloride standard) in the Delta, WOMT did not commit to any specific Delta Cross Channel Gate closures as requested from EBMUD. In the short term, Project Agencies will assess the water quality condition accordingly to further evaluate the feasibility of a shorter gate closure duration. Normal real-time monitoring of water quality in the Delta will continue.

Next WOMT meeting is scheduled for October 12, 2010.
