Introduction

Integrated Regional Water Management (IRWM) is a collaborative effort to identify and implement water management solutions on a regional scale that increase regional self-reliance, reduce conflict, and manage water to concurrently achieve social, environmental, and economic objectives. IRWM involves an array of stakeholders across the state. This Catalog of Resources highlights some of the resources and tools available to IRWM Stakeholders to build capacity in their regions and encourage stakeholder engagement in IRWM.

If you have questions or would like additional information, please contact your Regional Coordinator at DWR-RC@water.ca.gov, and we will be happy to assist you!
