---

# Use Water Wisely

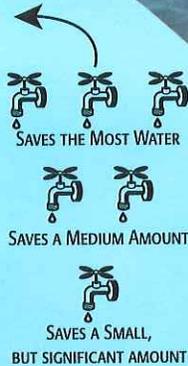

## Tips for Saving Water

### Kitchen

Prepare food efficiently.

Speed cleaning food by using a vegetable brush. Spray water in short bursts. Faucet aerators cut consumption.

### Conserving Water:

- ✓ Protects clean drinking water, a decreasing resource.
- ✓ Saves money in water and sewage rates.
- ✓ Reduces sewage treatment loads.

## Stop Leaks!

In just 3 months, a continuous leak wastes an amazing amount of water. Check out this chart to see how a tiny leak produces a big problem!

Diameter of Stream at 60 psi	Gallons	Daily Average	Diameter of Stream at 60 psi	Gallons	Daily Average
1/4 inch	1,181,000	13,122	1/8 inch	296,000	3,288
3/16 inch	652,000	7,244	1/16 inch	74,000	822

- Even-numbered addresses water on Tues., Thurs. & Sat.
- For Help Setting Sprinkler Timers.

Water Conservation Tips      Report Water Waste  
342-4580      www.modestogov.com

As you are enjoying this bottle of Modesto's Water, please remember that every drop is precious.

We appreciate your cooperation in conserving and protecting our community's water supply.

Conserving is not only critical for maintaining adequate supplies for our future, it makes good dollars and cents.

Every gallon saved helps to keep our water rates at reasonable levels. Please help eliminate water runoff by watering only as much as necessary. Please don't waste water by hosing down sidewalks and driveways. Outdoor watering is prohibited between 12:00 noon through 7:00 p.m. For more information on water conservation, visit us on our new web site.
