May 23, 2012

Ms. Jenny Gain, PE  
Senior Engineer  
City of Antioch  
Post Office Box 5007  
Antioch, California 94531

Dear Ms. Gain:

The Department of Water Resources (DWR) has reviewed the City of Antioch's 2010 Urban Water Management Plan (UWMP) received on July 15, 2011. The California Water Code (CWC) directs DWR to report to the legislature once every five years on the status of submitted plans. In meeting this legislative reporting requirement, DWR reviews all submitted plans.

DWR's review of plan has found that the plan has generally addressed the overall requirements of the CWC, with one exception. The interim water use target reported in the plan was mistakenly set based on a value from the 20x2020 Water Conservation Plan. SB X7-7 defined the interim target as being the midpoint between a supplier's baseline water use and 2020 water use target. In Antioch's case, the interim target should be 176 gpcd rather than 200 gpcd as reported in the plan. DWR encourages the City to plan and implement water conservation measures to meet the interim target of 176 gpcd in 2015. In updating the UWMP in 2015, the City should revise the interim target to reflect the correct value.

DWR's review of plans is limited to assessing whether suppliers have addressed the required legislative elements. In its review, DWR does not evaluate or analyze the supplier's UWMP data, projections, or water management strategies. This letter is simply meant to acknowledge that the City of Antioch has addressed these requirements. The results of the review will also be provided to DWR's Financial Assistance Branch.

If you have any questions regarding the review of the plan, or urban water management planning, please don't hesitate to email or call.

Sincerely

A handwritten signature in black ink, appearing to read "Peter Brostrom".
