C-11 Lines of Equal Depth to Water in Wells, Colusa, Butte, Glenn and Tehama Counties, Spring 1964.

AUTHORIZATION

Authorization for the continuing program of ground water measurement and collection, and publication of ground water level data is included in Sections 226 and 12616 of the California Water Code. Section 226 provides that:

> "The Department, either independently or in cooperation with any person or any county, state, federal, or other agency, may do any of the following:
>
> (a) Conduct investigations of all or any portion of any stream, stream system, lake or other body of water;
>
> (b) Investigate either or both surface and underground water conditions;
>
> (c) Collect records of diversion and use of water;
>
> (d) Supervise distribution of water in accordance with agreements and court orders therefor."

Section 12616 provides that:

> "The Department may conduct investigations of the water resources of the State, formulate plans for the control, conservation, protection, and utilization of such water resources, including solutions for the water problems of each portion of the State as deemed expedient and economically feasible, and may render reports thereon. In conducting such investigations and formulating such plans, the Department may conduct investigations and surveys to determine the availability, usability, extents, and boundaries of underground basins."

ACKNOWLEDGMENTS

In the preparation of this report, valuable assistance and contributions were received from many public and private agencies. Special mention is made of the following agencies whose cooperation is gratefully acknowledged.

Arcade County Water District
Butte County
California Water Service Company
Colusa County
East Bay Municipal Utility District
Glenn County
Lake County
Placer County
Sacramento County
Sacramento Municipal Utility District
San Joaquin County
Solano County
South San Joaquin Irrigation District
South Sutter Water District
Sutter County
Tehama County
United States Bureau of Reclamation
United States Geological Survey Ground Water Branch
Yolo County
Yuba County

INTRODUCTION

This report contains ground water level measurements from 2410 wells for the period July 1, 1963, through June 30, 1964. It contains hydrographs of selected wells and maps showing elevation of and depth to water level in wells.

Scope of Report

There are 38 ground water basins or areas in the Northern Central Valley Region and the Northern Lahontan Region for which data are reported as shown on Plate C-1. The ground water basins are separated physically by nonwater bearing rock, constriction in permeable materials, topographic ridge or shoreline of a lake. Ground water areas are subdivisions of ground water basins and are separated on the basis of political boundaries such as a county line or boundary of an irrigation district. The Northern Central Valley Region comprises the Sacramento River Basin and the northern portion of the San Joaquin River Basin.

Average changes in ground water levels from the spring of 1963 to the spring of 1964 and a summary of ground water level data collected are presented in Table 1. Ground water level measurements obtained during the reporting period, July 1, 1963, to June 30, 1964, are listed in Table 2.

The average annual depth to water for the areas in the Sacramento Valley and San Joaquin County since 1958 is depicted on Plate C-2. Hydrographs showing fluctuations in

water levels during the period of record at a few selected wells are presented on Plate C-3.

Ground water contour maps of the elevation of ground water and the depth to ground water in wells for the fall of 1963 in the Sacramento Valley and San Joaquin County are shown on Plates C-4, C-5, C-6, and C-7, and for the spring of 1964 on Plates C-8, C-9, C-10, and C-11.

Measurement Techniques

Elevation of ground surface at a well is usually taken from topographic maps of the U. S. Geological Survey. Depth to water is the distance from the ground surface to the water level in the well.

In most wells the depth to water is a direct measurement made with a metal tape and is accurate to $\pm$ 0.1 foot. In some wells, especially deep ones, measurements are made with an air line and pressure gage, or an electric sounder.

Flowing, or pressure wells, are sometimes measured by the use of either pressure gages or static tubes.

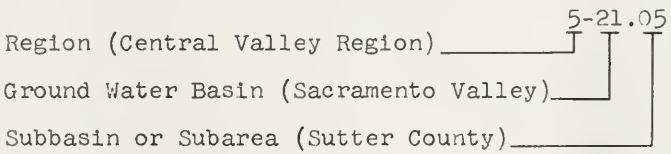
Well grids are selected to reflect the ground water conditions of the area, to prepare ground water level contour maps and to provide good areal distribution. These grids are continuously reviewed. As wells become unmeasurable, and new, measurable wells are developed in the area, the grids are revised.

Numbering Systems

The numbering systems used by the Department were developed to facilitate processing of water level measurement data.

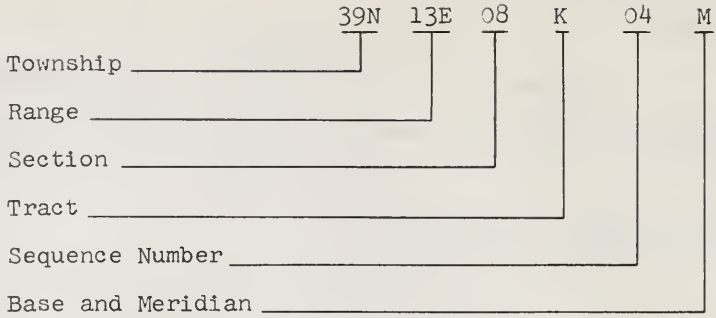
Region and Basin Designation

The regions used in this report are geographic areas defined in Section 13040 of the Water Code. That portion of Northern California covered by this report comprises the northern portions of Central Valley Region No. 5 and Lahontan Region No. 6. A decimal system of the form 0-00.00 has been selected according to geographic regions, ground water basins, and subbasins or subareas as follows:



Well Numbering System

The State Well Numbering System is based on township, range, and section subdivisions of the Public Land Survey. The number of a well, assigned in accordance with this system, is referred to as the State Well Number, as illustrated below:



This number identifies and locates the well. In the example, the well is in Township 39 North, Range 13 East, Section 8, Tract K of section which is divided as follows:

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Sequence numbers in a tract are generally assigned in chronological order. The example is the fourth well in Tract K assigned a well number. The Base and Meridian refer to Humboldt (H), Mount Diablo (M), and San Bernardino (S) Base and Meridians.

TABLE 2

GROUND WATER LEVEL MEASUREMENTS
July 1, 1962, to June 30, 1963

Explanation of the Headings and Symbols
Used in the Columns of the Table

State Well Number - Refer to the explanation in the Introduction on "Well Numbering System." In this report all well numbers are referenced to the Mount Diablo Base and Meridian; therefore, the "M" at the end of the number is omitted.

Well Use - The use of water is indicated as follows:

Code	Well Use
1	Domestic
2	Irrigation
3	Municipal
4	Industrial
5	Injection
6	Drainage
7	Domestic and Irrigation
8	Test
9	Stock
0	Unused

Well Depth - Well depths shown were reported by the owner, obtained from a drillers's log, or measured at the time of the well canvass.

Period of Record - The last two digits of the year the record began or ended are shown.

Ground Surface Elevation - The numbers in this column are the elevation in feet above mean sea level (U.S.G.S.) of the ground surface at the well.

Date - The date shown in the column is the date when the depth measurement given in the next column was made.

Ground to Water Surface - This is the measured depth in feet from the ground surface to the water surface in the well; certain of the depth measurements in the column may be preceded by a number in parentheses to indicate a questionable measurement. The code applicable to these "questionable measurements" is as follows:

(1) Pumping
(2) Nearby pump operating
(3) Casing leaking or wet
(4) Pumped recently
(5) Air or pressure gage measurement
(6) Other
(7) Recharge operation at or near well
(8) Oil in casing
(9) Caved or deepened

When a measurement was attempted, but could not be obtained, then only a number in parentheses is shown in the column. The code applicable to these "no measurements" is as follows:

(1) Pumping
(2) Pump house locked
(3) Tape hung up
(4) Cannot get tape in casing
(5) Unable to locate well
(6) Well has been destroyed
(7) Special
(8) Casing leaking or wet
(9) Temporarily inaccessible
(0) Measurement discontinued

The words FLOW and DRY are shown in this column to indicate a flowing or dry well, respectively. A minus preceding the number in this column indicates that the static water level in the well is this distance in feet above the ground surface.

Water Surface Elevation - This is the elevation in feet above mean sea level (U.S.G.S. Datum) of the water surface in the well. It was derived by subtraction of the depth measurement from the ground surface elevation.

Agency Supplying Data - Each number in this column is the code number for the agency supplying data for that measurement. The agencies supplying data for this report and the code numbers assigned to them are as follows:

Agency Code	Agency
4202	Sacramento Municipal Utility District
4400	Arcade County Water District
4701	California Water Service Company
5000	U. S. Geological Survey
5001	U. S. Bureau of Reclamation
5050	Department of Water Resources
5100	Tehama County
5101	Colusa County
5102	Sutter County
5103	Yuba County
5104	Yolo County
5105	Glenn County
5106	Butte County
5107	Placer County
5108	Sacramento County
5109	Solano County
5110	San Joaquin County
5111	Lake County
5401	South Sutter Water District
7518	South San Joaquin Irrigation District
8201	East Bay Municipal Utility District
