Subject: 2016 Water-Energy Grant Solicitation -- Comments on Draft

Greetings,

In the Draft 2016 Water-Energy Grant Program Guidelines, Section II – Eligibility, Other Requirements - #1, (page 5), recommend clearly defining what constitutes an “urban area” and/or “urban”. Either a reference to a specific state agency generated definition or one newly defined by IRWM would help to clarify any ambiguity because as written, a Community Plan which defines itself as being urban would qualify for the grant funding.
