Subject: Please provide information on the Grant funding program
Date: Monday, April 13, 2015 2:09:01 PM

Hello Craig,

Sorry I was catching you as you were leaving for a meeting. I am with the Delta Stewardship Council and we have been tracking DWR's grant programs, specifically grant programs that provide funds to entities that either 1) are in the Delta or 2) are outside of the Delta but some of their water supply is drawn from the Delta via SWP (and/ or CVP) exports.

I am interested in attending the public meeting on April 17, so any information on the meeting that you could provide would be great. In addition, it would be appreciated if you could forward any information DWR may have that sorts out specific entities, as described above, who will receive funding from this grant. We applied DWR and your efforts to assist locals with their water supply issues as it assists the locals to rely more on regional water supply sources (such as conjunctive use, groundwater recharge, recycled water, gray water capture and use, etc...). This is one of the policies of the Delta Plan that we are working with sister agencies to coordinate.

Thank you for your time and I look forward to the opportunity to possibly meet you on Friday. Have a great day.

Sincerely,

ANTHONY NAVASERO, P.E. | Senior Engineer, Water Resources
