8/ Tract 19 also has water rights from French and North Fork French Creeks.

COMMENTS ON FIELD SCHEDULE FOR FRENCH CREEK

1.) All water rights listed on the field schedule for the Springs and Unnamed Springs Group (Table 1 of decree) are for "continuous use without regard to season". All water rights listed on the field schedule for the North Fork French Creek Group (Table 2), Miners Creek Group (Table 3), and French Creek, Payne Lake Creek, Horse Range Creek, and Duck Lake Creek Group (Table 4) "are for continuous use without regard to season, but are limited during the period from October 1 of each year to March 31 of the succeeding year to the amount required for domestic, stock water or other beneficial use". See paragraph 12.

2.) Paragraph 4 allows: 1.) all water users to rotate between ditches and 2.) any one water right to be diverted at a greater rate to provide a more convenient irrigation head. Practice of both items is limited to a 30-day continuous diversion equivalent and does not impair or infringe on any other water right.

3.) Paragraph 5 allows: 1.) rotation down ditch with multiple users by agreement between all users and 2.) users with water rights to more than one ditch to combine water rights into one ditch. Provided practice of either items does not impair or infringe on any other water right.
