			<b>ACCUMULATIVE TOTAL</b>	<b>9.996</b>	<b>110.00</b>	
<b>Notes:</b>						
1/	This water is imported from the West Branch Feather River to Butte Creek by PG&E via Toadtown Canal, De Sabla Power Plant, and Centerville Power Plant. The import water is measured by a 10.0 ft Parshall flume known by PG&E as BW-12. Five percent is subtracted from the water measured at the Parshall flume as conveyance loss between the flume and Diversion 50. See paragraph 37. Contact Jim Bundy (PG&E) regarding the operation of the PG&E power system. <b>All West Branch Feather River imported water is for year round use. See paragraph 36.</b>					
2/	See Paragraph 39 regarding additional decreed water rights from the allotments to Tracts 1 and 2 for decreed owners: Estes, Harold D., Thomasson etal, and USDA. Also, M & T and Parrott (Tracts 1 and 2) have dedicated 40 cfs of their water right from either the PG&E import water or Butte Creek natural flow (paragraph 85) for instream flow purposes during the period of October 1 through June 30. See page 8 of 8 for all fish flow requirements.

**BUTTE CREEK**

(Schedule 7, Decree 18917)

<b>DWR Tract</b>	<b>Present Owner</b>	<b>Decreed Owner</b>	<b>Diversion Number</b>	<b>Priorities, cfs</b>			<b>Total</b>
<b>Notes:</b>				<b>1</b>	<b>2</b>	<b>3</b>	
<b>1/</b>	Tracts 31 and 32 currently use Diversion #50.						
<b>2/</b>	In 1998, Resource Renewal Institute purchased the (decreed) water rights for Tracts 25, 29, and 30 from Patrick Kennedy and dedicated these water rights to instream flow for the protection of fish and wildlife. See amendment to Decree 18917 dated 5/11/98. See page 8 of 8 for all fish flow requirements.						
<b>4/</b>	Tracts 22,23,24 diversions No. 57 and 58 (pumps) take their water through Durham Mutuals diversion No. 56. Durham Mutual wheels this water through their system to the decreed owners.						
<b>5/</b>	Tracts 10 and 8 currently use Diversion #60.						
<b>6/</b>	Tract 4 changed its point of diversion from #62 to #61. See amendment to Decree 18917 dated 6/15/98. This amendment includes special stipulations by DFG regarding bypass flows. See page 8 of 8 for all fish flow requirements.						
<b>7/</b>	Durham Green Homeowners Association has a 0.013 cfs water right. However, DWR is not able to determine a valid billing address. Therefore, this right was split among each of the 13 adjacent landowners who live around the green. Each surrounding water right holder was assigned an additional 0.001 cfs.						
<b>8/</b>	Tract 26 has a 5.00 cfs decreed water right and a SWRCB App. # 22564 water right of 2.33 cfs.						
<b>9/</b>	SWRCB License No. 10432 from Diversion 54 has an 8.000 cfs water right. This right has a lower priority than all Schedule 7 rights.

<b>Notes:</b>													
1/	All water rights defined in paragraphs 80 through 87 are inferior to the water rights defined in Schedule 7.												
2/	<b>Paragraph 80</b> , July 1 to September 30. Total decreed diversions for Tract 5 from Butte Creek and Hamilin Slough not to exceed 21.7 cfs. Decreed water rights for watermaster billing purposes = 21.70 cfs.												
3/	<b>Paragraph 81</b> , April 1 to September 30.												
4/	<b>Paragraph 82</b> , April 1 to June 15. May be diverted at 2.5 times indicated flow rate (20 cfs total) provided average rate of diversion for the period of April 1 to June 15 does not exceed the continuous flow allotment (1,206 ac-ft) and does not interfere with other decreed water rights.												
5/	<b>Paragraph 83</b> , 15.00 cfs from April 1 to June 30 and 6.70 cfs from July 1 to September 30. Total decreed diversions for Tract 5 from Butte Creek and Hamlin Slough not to exceed 21.7 cfs.												
6/	<b>Paragraph 84</b> , April 1 to September 30. May be diverted at 2.5 times indicated flow rate (23.75 cfs) provided average rate of diversion for the period of April 1 to September 30 does not exceed the continuous flow allotment (3,448 ac-ft) and does not interfere with other decreed water rights. Also see footnote 11.												
7/	<b>Paragraph 85</b> , April 1 to October 15. May be diverted at 2.5 times indicated flow rate (125 cfs total) provided average rate of diversion for the period of April 1 to October 15 does not exceed the continuous flow allotment (19,636 ac-ft) and does not interfere with other decreed water rights. 5.0 cfs remainder of the year. Also, M & T and Parrott (Tracts 1 and 2) have dedicated 40 cfs of their water right from either Butte Creek natural flow or the PG&E import water (Schedule 3) for instream flow purposes during the period of October 1 through June 30. Also see paragraph 39 regarding additional decreed water rights from the allotments to Tracts 1 and 2 for decreed owners: Estes, Harold D., Thomasson etal, and USDA.												
8/	<b>Paragraph 86</b> , entire year.												
9/	<b>Paragraph 87</b> , April 1 to June 15. May be diverted at 3 times indicated flow rate (99.99 cfs) provided average rate of diversion for the period of April 1 to June 15 does not exceed 75 cfs (11,306 ac-ft) and does not interfere with other decreed water rights. Also see footnote 11.												
10/	Western Canal requested to be included in watermaster billing beginning in 1997.												
11/	Tract 33 and Tract 4 changed their points of diversion from #63 and #62 to #61. See amendment to Decree 18917 dated 6/15/98. This amendment includes special stipulations by DFG regarding bypass flows. See page 8 of 8 for all fish flow requirements.

Notes: 1/ Including 110.0 cfs import water by PG&E from the West Branch of the Feather River, total water rights = 153.41 cfs.  
 4/ 1.50 cfs dedicated instreamflow from Schedule 7 for Tracts 25, 29, & 30.  
 5/ 40.00 cfs dedicated instream flow from Schedule 3 (Feather R.) or 7 (natural flow) for Tracts 1 & 2 from 10/1 - 6/30 only.  
 6/ Additional required bypass flow for Paragraph multipliers. No multiplier paragraph water rights during this period.  
 7/ 60.00 cfs minimum required bypass flow prior to any SWRCB License. No SWRCB water rights during this period.  
 8/ Does not include notes 4/ and 5/ which are included in Schedule 3 or 7 water rights.

										Updated ??
<b>SUMMARY OF BUTTE CREEK INSTREAM FLOW REQUIREMENTS</b>										
The following summarizes the various instream flow requirements for the Butte Creek WMSA.										
1.)	Tracts 1 and 2 (M & T and Parrott) have dedicated 40.0 cfs of their water rights for instream flow purposes from either the PG&E import water or Butte Creek natural flow during the period of October 1 through June 30. This water is to be measured below Diversion #50.									
2.)	Tracts 25, 29, and 30 (Resource Renewal Institute) has dedicated their entire water right of 5.0 cfs from April 1 to October 15 and 1.5 cfs from October 16 to March 31 1st priority from Schedule 7 for instream flow purposes. This water is to be measured below Diversion #54. See amendment to Decree 18917 dated 5/11/98.									
3.)	Tract 4 (Decreed Owner E. E. White) and Tract 33 (Western Canal) changed their points of diversion from Diversions #62 and #63 to #61. See amendment to Decree 18917 dated 6/15/98. This amendment includes special stipulations by DFG regarding bypass (instream) flows for Tracts 4 and 33 as follows:									
	A.) 10 cfs from July 1 to October 1 from all water rights defined in Decree 18917 for Tracts 4 and 33 (Western/Ryan/McAlister). This water is to be measured below Gorrill Dam.									
	B.) 1.0 cfs for every 2.0 cfs water diverted under the multiplier water rights defined in paragraphs 84 and 87 until 80.0 cfs is available below Gorrill Dam. This water is to be measured below Gorrill Dam.									
4.)	Tracts 6 (Rancho Esquon) is required to bypass 60.0 cfs prior to the diversion of their SWRCB appropriative water right. See SWRCB License #11046 (= 66.0 cfs). This license was issued prior to items 1, 2, and 3 and is for the period of April 1 through June 15 only. The 60.0 cfs bypass flow is effectively superceded by item 3 (if item 3 water right diversions are being exercised) as this license is inferior to all water rights defined in Decree 18917.
