## Foreword

The Department of Water Resources, as Watermaster, is pleased to submit this report on water use and water supply conditions in the Central Basin during the 2012-2013 fiscal year. The report is prepared annually in accordance with the provisions of the Los Angeles County Superior Court Judgment in the Central Basin. The Judgment, together with Part 4, Division 2 of the California Water Code, authorizes this publication and the Department's administration of the Watermaster Service Area.

In 2012-2013, the parties pumped 196,262 acre-feet of their 259,509 acre-feet of allowable extraction and kept 38,072 acre-feet as carryover. Parties with non-consumptive water use permits pumped 115.38 acre-feet.

This report includes information on groundwater extractions, use of imported water and recycled water, replenishment operations, and the budget and finances of Watermaster Service during the 2012-2013 fiscal year. The first part of the report is a discussion of the water conditions in the Central Basin, the second part is the tables, and the third part is the figures.

Moreover, because the July 2011 stay order on the implementation of the Drought Carryover Provisions of the Judgment was lifted this year, Watermaster adopted a rule on the Application of the Drought Carryover Provisions (Appendix A) and revised the Water Rights Accounting tables for 2010-2011 (Appendix B) and for 2011-2012 (Appendix C).

The Watermaster appreciates the assistance and support received from the many public and private organizations and individuals whose contributions were essential to this report. The success of Watermaster Service is dependent on continued cooperation and communication between the Watermaster and the water users.

Mark Stuart, Chief  
Southern Region  
and Watermaster

## Notes

The Judgment imposes certain limits on extraction of water from the Central Basin. Parties might from time to time claim that they have imported and stored water in the Basin, or that they have the right to import or extract stored water, or that the Court's jurisdiction should be exercised to manage groundwater storage under the Judgment. There is pending litigation concerning such issues. As it has done historically, the Watermaster will report the total amount of water extracted by a party and the amount of that party's extraction that the Watermaster concludes is allowed under the Judgment (subject to prior Order with regard to any "Declared Water Emergency"). The Watermaster will also note the extracted amount each party claims is from imported water. Where the Watermaster concludes that the amount extracted exceeds the allowed extraction, the Watermaster reports such extraction as a "violation" of the Judgment. The issue of the Watermaster's interpretation of the Judgment regarding these issues is pending before the Court.

## Introduction

The Central Basin Watermaster Service Area overlies about 227 square miles of the Central Basin (Basin) in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area. The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities are found within the Watermaster Service Area. Groundwater from the Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Basin threatened the area's groundwater supply and caused the intrusion of sea water into the southern part of the Basin. However, timely legal action and adjudication of the water rights halted the overdraft and helped to prevent further damage to the Basin. Since that

<sup>1</sup> Provisional information from Los Angeles County Department of Public Works.

<sup>2</sup> Excludes extractions by parties with non-consumptive water use permits and by nonparties.

<sup>3</sup> Excludes groundwater imported from the San Gabriel Basin.

time, groundwater extraction from the Basin is limited to the amounts set by a Superior Court Judgment<sup>4</sup> and is monitored by a Court-appointed Watermaster.<sup>5</sup>

The Watermaster assists the Court in the administration and enforcement of the provisions of the Judgment.<sup>6</sup> Among other duties, the Watermaster monitors extractions and reports significant water-related events in the Basin to the Court and to the parties to the Judgment. The activities of the Watermaster are key components for the effective management of the groundwater resources of the Basin.

This report, which is required by the Judgment,<sup>7</sup> summarizes the activities of the Watermaster, the conditions of the groundwater supply, and the quantities of water used in the area overlying the Basin and for the replenishment of the Basin; it also includes a financial report for the 2012-2013 fiscal year.<sup>8</sup>

## Water Use

Water used in the area overlying the Basin includes groundwater extracted from the Basin, imported water, and recycled water. Figure 2 shows the water use since 1953.

**Extractions by Parties.** The Judgment limits the amount of groundwater each party may extract annually from the Basin.<sup>9</sup> This limit, referred to as the Allowed Pumping Allocation (APA), is shown in Table 1 for each party. A recipient of Exchange Pool water may pump the amount released to it in addition to its APA. The volume of water extracted from most wells is reported monthly.<sup>10</sup> Table 2 lists, by party, the volume of groundwater extracted each month from each active well in the Basin. Figure 3 shows the pattern of groundwater extractions during 2012-2013.

To provide flexibility in the control of groundwater extractions, the Judgment contains provisions allowing each party to carry over into the succeeding administrative year<sup>11</sup> a portion of its unused APA and in some cases to over extract.<sup>12</sup> This flexibility was necessary to meet unforeseen water demand.

One provision allows each party to carry over from one administrative year to another any unused APA not to exceed 20 percent of its APA or 20 acre-feet, whichever is

<sup>10</sup> Parties extracting small volumes of water report extractions quarterly.

<sup>11</sup> July 1 through June 30

<sup>12</sup> Judgment Part III. Subpart B.

greater.<sup>13</sup> In addition, any unused Exchange Pool water can be carried over into the following fiscal year.

**Overextractions.** The Judgment provides for overextractions under certain conditions.<sup>14</sup> A party may over extract by 20 percent of its APA or 20 acre-feet, whichever is greater.<sup>15</sup> When a party overextracts in violation of the Judgment, Watermaster notifies the party to resolve the overextraction issue. Under certain circumstances, a party may overextract in a greater amount; however, prior approval must be obtained from the Watermaster.<sup>16</sup> The overextraction must be made up in the following administrative year unless Watermaster concludes that to require the party to make up the overextraction would create an unreasonable hardship for the party. In such cases, Watermaster may grant relief from the requirement that the party must make up the overextraction in the following year, such as prorating the reduction in the party's APA over a period of up to five years.<sup>17</sup>

Table 3 lists the names of parties that have over extracted groundwater during the year and shows the amount of overextraction by each party. During 2012-2013, six parties had a combined overextraction of 23,657.02 acre-feet. The table also identifies one party, State of California (CalTrans), that has over extracted in violation of the Judgment. Since 1997-1998, CalTrans has been pumping groundwater for dewatering beneath the 105 freeway in Downey.<sup>18</sup> CalTrans extracted 22,844.75 acre-feet of water during 1997-1998 through 2011-2012 and 671.41 acre-feet in 2012-2013. Watermaster has suspended its effort to address the overextraction of groundwater by CalTrans.<sup>19</sup>

**Extractions by Nonparties.** Table 4 shows extractions by nonparties totaled 1.04 acre-feet. Extractions by nonparties are shown by well and by month in Table 2.

**Extractions of Contaminated Groundwater.** Any party may petition the Water Replenishment District of Southern California (WRD) for a Non-consumptive Water Use Permit (NCWUP) as part of a project to remedy or ameliorate groundwater contamination. If the petition is granted, the party may extract the groundwater without the production counting against its production rights.<sup>20</sup> Table 5 lists current Non-

---

<sup>13</sup> Judgment Part III. Subpart A. 1. The Judgment was amended to permit each party to carry over a maximum of 100 percent of its APA from 1976-1977 and 1977-1978 because of drought.

<sup>14</sup> Judgment Part III. Subpart B.

<sup>15</sup> Judgment Part III. Subpart B. 1. (a)

<sup>16</sup> Judgment Part III. Subpart B. 1. (b)

<sup>17</sup> Judgment Part III. Subpart B. 2.

<sup>18</sup> CalTrans has been discharging this water to the Los Angeles and the San Gabriel Rivers after treatment through granulated activated carbon units.

<sup>19</sup> In a letter to the Director of the Department of Water Resources, dated September 25, 2008, the Central Basin Water Association, which represents the majority of the water right holders, said that taking legal action against Caltrans to address overextraction from the Central Basin "may at best confuse the issues before the court [regarding groundwater storage], and at worst create unnecessary delay and difficulty for a judge to resolve both questions."

<sup>20</sup> Judgment Part III. Subpart B. 7.

consumptive Water Use Permits issued by WRD and the amounts of groundwater extracted under those permits during 2012-2013.

**Transfers of Allowed Pumping Allocations.** Each year, APAs are transferred between parties through sales and leases. Table 6 shows the succession of APAs in the Basin as of June 30, 2013. Sales have reduced the number of parties from 508 in 1966-1967 to 133 in 2012-2013. Figure 4 shows samples of suggested water rights transfer agreements.

Table 7 shows transfers of APAs through sales and leases. During 2012-2013 there were four sales of APAs that totaled 635.5 acre-feet and 52 leases that totaled 28,381.47 acre-feet. Each party's APA, as of June 30, 2013, is also shown in Table 1.

When land is sold on which a water right has been developed, the Watermaster must be furnished a copy of the sale document if the water right is also sold. The water right does not pass to the new land owner unless the sale document specifies that the water right was sold with the land. For the proper accounting of the water right, the sale document must specify the exact amount of water right.

In transferring water rights, parties must specify (1) the type of right (i.e., APA, normal carryover, or drought carryover), (2) the amount of right to the nearest 0.01 acre-foot, and (3) the period of the lease, if applicable. Moreover, all leases must be made on a fiscal year basis and must be executed by the parties and received by Watermaster by June 30 of the year in which the lease is effective.

For parties wanting to buy, sell, or lease water rights, Watermaster maintains a web page.<sup>21</sup> Any party wishing to be listed should call the Watermaster. This is a courtesy to assist parties unable to resolve problems regarding a surplus or deficiency of water supply. Watermaster will make no recommendation regarding transactions conducted relative to the use of this service.

**Exchange Pool.** The Judgment authorizes an Exchange Pool to provide additional water rights to parties without sufficient water.<sup>22</sup> If a party's estimated water requirement for the following fiscal year exceeds its total available water supply, that party may request additional water from the Exchange Pool. Any party wishing to purchase water from the Exchange Pool must file the request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the following fiscal year, and Watermaster will not process Exchange Pool forms. Table 8 shows that there were no requests for Exchange Pool water during 2013-2013.

**Status of Extraction Wells.** In the Basin there are 306 reported active extraction wells and 231 reported inactive extraction wells (Table 2). The locations of the active extraction wells are shown on Figure 3. Table 9 shows four new extraction wells were completed and 11 extraction wells were destroyed.

---

<sup>21</sup> [www.water.ca.gov/watermaster](http://www.water.ca.gov/watermaster)

<sup>22</sup> Judgment Part III, Subpart C.

**Meter Testing Program.** Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well.<sup>23</sup> It is the responsibility of each party to ensure that its meter and test facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a party requests a meter calibration.<sup>24</sup> Watermaster tests meters by volumetric or pitot comparisons. Watermaster notifies a party that it must repair or replace its meter when the meter registers beyond 5 percent accuracy. Watermaster calculates the monthly water production for each well using the meter readings and Unit of Measure Code reported for the well that month. If the registration accuracy of the meter deviates by as much as 10 percent, the calculated well production could be subject to revision.<sup>25</sup>

During 2012-2013, Watermaster visited 57 parties, tested 239 meters, and performed 20 well investigations. Tests showed that four meters were more than 5 percent fast, with registration accuracies of plus 6.5 percent to plus 18 percent, and two meters were more than 5 percent slow with registration accuracies of minus 12 percent to minus 34 percent. Meters at three sites were inoperative, and meters at nine sites could not be tested because the well sites lacked test points or the pumps were inoperative. Watermaster notified and required the responsible parties to make the needed repairs.

## Water Supply

Water supplies available to the communities overlying the Basin include groundwater extracted from the Basin, imported surface water and groundwater, and recycled water.

**Precipitation.** Because layers of materials of low permeability overlie the primary water-producing aquifers throughout much of the Basin and largely impermeable surfaces (i.e., pavement and buildings) cover most of the forebay areas, precipitation over the Basin has relatively little direct influence on the replenishment of the groundwater in the Basin. However, during years of high rainfall, increased runoff from the areas upstream of the Basin would result in increased replenishment to the Basin and would probably result in decreased water demand by the water users overlying the Basin which, in turn, could result in lower rates of groundwater extraction from the Basin.

During 2012-2013, the following amounts of precipitation were measured at six precipitation stations: 5.02 inches at 96<sup>th</sup> and Central, 7.58 inches at Montana Ranch, 4.72 inches at La Mirada, 5.01 inches at Whittier City Yard, 4.80 inches at USC, and 6.16 inches at Imperial Yard.<sup>26</sup> Figure 1 shows the locations of these precipitation

---

<sup>23</sup> Judgment Part II. 1. (b)

<sup>24</sup> Judgment Part II. 1. (c)

<sup>25</sup> The Board of Directors of the Central Basin Water Association concurs with this Watermaster policy regarding adjustments to reported well production amounts.

<sup>26</sup> Provisional data provided by Los Angeles County Department of Public Works.

stations, and Figure 5 shows the monthly average of the rainfall measured at these stations. Based on the rainfall measured at these stations, the mean precipitation over the Central Basin was 5.55 inches, which is 40 percent of the long-term mean precipitation at these stations.<sup>27</sup>

**Groundwater Recharge.** Natural replenishment of the groundwater in the Basin is largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As mentioned above, little of the rainfall over the Basin would be likely to infiltrate into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Basin is accomplished by spreading water at the Rio Hondo and the San Gabriel River spreading grounds in the Montebello forebay (Figure 1).<sup>28</sup> The sources of this replenishment water include local storm runoff, purchased imported water, and recycled water from three reclamation plants located upstream of the Basin.<sup>29</sup> Table 10 shows the sources and quantities of water spread to replenish the groundwater. In 2012-2013, replenishment water included 8,274 acre-feet of local storm runoff (which is 32,140 acre-feet less than in 2011-2012), 58,113 acre-feet of recycled water, and 2 acre-feet of untreated imported water. Local runoff accounted for 13 percent of the water, recycled water accounted for 86 percent, and the untreated imported water accounted for 1 percent.

**In-Lieu Replenishment.** During the 1965-1966 water year,<sup>30</sup> the WRD, in cooperation with the Metropolitan Water District of Southern California (MWD), began an in-lieu replenishment program. WRD may contract with any producer having access to supplemental water that could be used in lieu of extracting groundwater from the Basin.<sup>31</sup>

The use of supplemental water in lieu of pumping groundwater does not change a party's water right,<sup>32</sup> but it counts as water pumped under the Judgment. The program may be used to (1) alter pumping patterns within the Basin, (2) replenish the groundwater in areas of low transmissivity where conventional recharge techniques are ineffective, (3) heighten the effect of injecting water to form a sea water barrier by reducing extractions, (4) reduce the amount of replenishment water purchased by WRD, and (5) reduce the annual extractions from the Basin. Table 11 shows that the City of Long Beach participated in the in-lieu replenishment program.

---

<sup>27</sup> Calculation of the long-term precipitation included the Downey Fire Department precipitation station rather than the Imperial Yard station.

<sup>28</sup> Water injected at the Alamitos Barrier Project also contributes to the replenishment of the Central Basin.

<sup>29</sup> The three water reclamation plants are the Whittier Narrows, San Jose Creek, and Pomona plants. The locations of the first two plants are shown on Figure 1, but the Pomona plant is farther upstream and is not shown on the figure.

<sup>30</sup> October 1, 1965 through September 30, 1966

<sup>31</sup> California Water Code Section 60230(p).

<sup>32</sup> Water Code Section 1005.1

**Imported Water.** Water is imported from northern California via the State Water Project and from the Colorado River and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the Cities of Compton, Long Beach, and Los Angeles. The City of Los Angeles also imports water from the Owens River-Mono Basin, and the California Domestic Water Company, the San Gabriel Valley Water Company, the Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Basin. Table 12 shows that in fiscal year 2012-2013, a total of 117,983 acre-feet of water was imported to the area overlying the Central Basin. The Water Replenishment District of Southern California (WRD) did not purchase seasonally discounted spreading water because the Metropolitan Water District of Southern California (MWD) discontinued the delivery of discounted water for groundwater replenishment in August 2011.

### Quality of Imported Water

Constituent	Colorado River Water <sup>33</sup> (mg/L)	State Water Project Water <sup>34</sup> (mg/L)
Chloride	84	67
Sulfate	222	42
Hardness (as CaCO <sub>3</sub> )	274	109
Total Dissolved Solids	574	259

**Exported Water.** California-American Water Company exported 2,505.68 acre-feet of groundwater from the Basin to its service area that overlies a portion of the West Coast Basin.

**Recycled Water.** Table 13 shows that 14,318 acre-feet of recycled water were used in the area overlying the Basin during 2012-2013. This amount is 560 acre-feet more than that used in 2011-2012. These amounts do not include the recycled water used to replenish groundwater in the Basin.

**Alamitos Sea Water Intrusion Barrier Project.** Sea water intrusion in the Alamitos Gap near the mouth of the San Gabriel River poses a threat to the groundwater in the Central Basin. The Alamitos Barrier Project is designed to prevent sea water intrusion into the fresh water aquifers of the Basin. The location of the barrier is shown on Figure 1. The Los Angeles County Department of Public Works operates the barrier project, which is comprised of four extraction wells that can be used to create a groundwater trough and 43 injection wells that create a groundwater ridge to halt sea water intrusion. In addition, the project includes 220 observation wells that are used to monitor groundwater levels and quality in the area. Table 14 shows the quantities of imported water and of recycled water injected into the barrier wells and the quantity of

<sup>33</sup> at Lake Mathews

<sup>34</sup> at Castaic Lake

water extracted. Figure 6 shows the quantities of water used in the barrier project since operation of the project began in 1965. The sea water intrusion problem has been contained by the barrier project.

**Groundwater Levels.** Figure 7 shows the locations of selected wells that are used to monitor groundwater level elevations. Figure 8 shows the water level elevations in key wells located in the Montebello forebay, and Figure 9 shows the water level elevations in wells perforated in the principal water producing aquifers in the Basin.

## Watermaster Administration Costs and Budget

The Judgment requires Watermaster to report its administration costs.<sup>35</sup> Table 15 shows that Watermaster income was \$462,765 and that expenditures were \$403,293.

The Judgment requires Watermaster to prepare an annual budget and to apportion it among the parties.<sup>36</sup> The total amount billed was \$356,000, and the total amount paid was \$357,484.86. The budget was submitted to the Parties on May 1, 2012, and it was adopted as the final budget on June 1, 2012. Table 16 shows the approved budget of \$560,000.

Table 17 shows the apportionment of the budget among the parties. A penalty of 5 percent is assessed if payments become delinquent. Seventeen parties were penalized because their payments were not made within the allowable 30 days after service of the invoice. Late fees totaling \$1,484.86 were collected for delinquent payments.

## Significant Water-Related Events

**Motion to Amend the Judgment.** On May 9, 2012, the State Supreme Court dismissed the petitions for review of the Court of Appeal decision that reversed the ruling of the Superior Court that denied jurisdiction over the motion to amend the Central Basin Judgment.<sup>37</sup> The case was remanded to the trial court.

On November 30, 2012, the case was assigned to Superior Court Judge Joanne O'Donnell, and she ruled that the Central Basin and the West Coast Basin Groundwater Storage Amendment cases are related. On April 3, 2013, both cases were assigned to Superior Court Judge Abraham Khan.

**Replenishment Assessment Exemptions.** On December 7, 2012, WRD adopted a new policy regarding Replenishment Assessment Exemptions (RAE) in the West Coast

---

<sup>35</sup> Judgment Part II. 1. (d)

<sup>36</sup> Judgment Part II. 1. (e)

<sup>37</sup> In 2009, some of the parties to the Judgment filed a motion to amend the Judgment to allow for groundwater storage in the Basin. Litigation of the case is ongoing. See earlier Annual Reports for more information.

Basin and in the Central Basin. A party with a Non-Consumptive Water Use Permit will not be granted a RAE if the party extracts water and does not return the water to the Basin.

**Water Emergency Declaration.** On February 6, 2013, Judge O'Donnell lifted the stay order on the implementation of the Drought Carryover Provisions of the Central Basin Judgment.<sup>38</sup> On May 16, 2013, Watermaster issued a draft rule on Application of Drought Carryover Provisions, and on June 17, 2013, the Rule<sup>39</sup> was adopted. On July 3, 2013, Watermaster mailed letters to the Parties informing them of their Drought Carryover 1991 (DCO-91) allocations<sup>40</sup>. However, the motion challenging the November 19, 2010, WRD declaration of a water emergency in the Basin has not been withdrawn.

**Extraction of Imported Water.** On April 26, 2013, CBMWD re-filed the motion for an order declaring that extraction of non-native imported water does not diminish a Party's Allowed Pumping Allocation under the Judgment.<sup>41</sup>

---

<sup>38</sup> Implementation of the WRD drought emergency declaration was stayed by Judge Kendig on July 13, 2011.

<sup>39</sup> See Appendix A for the Rule on Application of the Drought Carryover Provision in the Judgment.

<sup>40</sup> See Appendix B for Revised Table of Water Rights Accounting for 2010-2011 and Appendix C for Revised Table of Water Rights Accounting for 2011-2012.

<sup>41</sup> CBMWD initially filed the motion with the court on September 19, 2011.

<sup>1</sup> See Table 6 and Table 7 for information concerning leases, transfer of water right entitlements, or prior ownership. Lease with flex includes carryover provisions.

<sup>2</sup> Allowable Extraction = Allowed Pumping Allocation + Carryover + Leases

<sup>3</sup> Balance = Allowable Extraction - Amount Pumped - In-Lieu

<sup>4</sup> Sold: 54.00 acre-feet from Atlantic Richfield company to Tesoro Logistics Operations LLC. Drought and Normal carryover were transferred in this sale.

<sup>5</sup> Sold: 11.50 acre-feet from Zane Living trust: 3.75 acre-feet to Corning Trust, 3.75 acre-feet to Footbridge 1 Trust, and 4.00 acre-feet to Nancy Dee Keane Living Trust. Normal carryover was transferred in this sale.

<sup>6</sup> Party extracts water under a non-consumptive water use permit. See Table 5.

<sup>7</sup> Sold: 70.00 acre-feet from The Jones Company to Montebello Land and Water Company.

<sup>8</sup> Sold: 500.00 acre-feet from City of Vernon to City of Norwalk.

**Table 2 – Groundwater Extractions (acre-feet)**

September Properties, LLC	22.00	1.96	2.28	0.32	20.00
Total				23,657.02	

<sup>1</sup> Overextraction = Allowable Extraction - Amount Pumped

<sup>2</sup> Judgment allows overextractions computed as 20 acre-feet or 20 percent of the Allowed Pumping Allocation plus carryover provisions, whichever is greater. Computations of Allowable Overextraction (Excess Production) in previous years may have been in error. But any errors had no effect on the Table of Water Rights accounting (all overextractions result in a negative carryover, without limit, in the subsequent year)

<sup>3</sup> Overextraction as of April 2013. No records for May or June 2013.

<sup>4</sup> Includes production by Caltrans for dewatering under the 105 Freeway in Downey.

<sup>5</sup> Violation of Judgment.

**Table 4 – Extractions by Nonparties**

Nonparty	Amount Pumped (acre-feet)
Atlas Iron and Metal Co	0.24

**Table 5 – Non-Consumptive Water Use Permits**

WRD Resolution No.	Party	Description	2012-2013 Extraction (acre-feet)
08-829	Ashland Chemical Company	Allowed to extract 135.00 acre-feet of water per year during the period beginning July 1, 2008 and ending on June 30, 2013.	10.53
09-854	The Boeing Company on behalf of the City of Long Beach	Exemption from the replenishment assessment for groundwater cleanup in Central Basin. Allowed to extract 97.00 acre-feet of water per year without obtaining water rights for the period of August 1, 2009 through July 31, 2014.	66.43
13-952	DeMenno Kerdoon on behalf of the City of Compton	Allowed to extract 25.00 acre-feet of water per year for the period of July 17, 2013 through July 16, 2018.	5.21
13-950	Defense Logistics Agency - Energy on behalf of the City of Norwalk	Allowed to extract 30.00 acre-feet of water per year for the period of February 3, 2009 through February 2, 2014.	12.97
13-947	Omega Chemical on behalf of Northrop Grumman	Allowed to extract 50.00 acre-feet of water per year for the period of October 1, 2012 through September 30, 2017.	20.24
<b>Total</b>			<b>115.38</b>

NOTES:

Parties that are underlined – current parties

Parties that are **bold and italic** – original parties as listed in the Central Basin Second Amended Judgment dated May 6, 1991. Party is also current if underlined.

Arrangement:

Party Names are arranged in straight alphabetical order.

A personal name is entered under the Last Name, First Name and Middle Name order.

**Table 7 – Transfers of Allowed Pumping Allocations (acre-feet)**

Watermaster Rule on  
Application of the Drought Carryover Provision in the Judgment

**Rule on Application of Drought Carryover Provisions  
Second Amended Central Basin Judgment  
Part III, Subpart A, Paragraphs 1 - 4<sup>1</sup>**

**Mark Stuart, Central Basin Watermaster**

1. Background

a. On or about September 29, 1977, the Los Angeles Superior Court issued an order entitled *Order Authorizing Temporary Mining of Basin (October 1, 1977 – September 30, 1978)*. This order addressed emergency circumstances caused by the drought conditions of 1976 and 1977. Among other things, the September 29, 1977 order provided “Drought Carryover” rights to Central Basin Judgment parties, rights that were in addition to parties’ extraction rights.

b. On or about May 6, 1991, the Los Angeles Superior Court issued an order amending the Central Basin Judgment (*Central and West Basin Water Replenishment District etc., v. Charles E. Adams, et al.*, Los Angeles County Superior Court Case No. 786656, May 6, 1991) (“Second Amended Judgment”). The Second Amended Judgment provides for both One Year Carryover and for Drought Carryover. The Second Amended Judgment’s Drought Carryover is effective following an announcement of a Declared Water Emergency by the Board of Directors of the Water Replenishment District of Southern California (WRD). The Drought Carryover remains effective until the Declared Water Emergency ends by expiration or by resolution of the WRD Board.

2. Definitions

a. The Watermaster will henceforth identify Second Amended Judgment “Drought Carryover” rights as “DCO-91” to distinguish such rights from 1977 “Drought Carryover” rights, to be called “DCO-77.” Watermaster records will henceforth account for DCO-91 separately from DCO-77.

b. The term “One Year Carryover” defined in the Second Amended Judgment at section III(A)(1) will be referred to in this document as the “Normal Carryover”.

c. The term “Allowable Extraction”<sup>2</sup> is defined as a party’s Allowed Pumping Allocation (APA),<sup>3</sup> as increased by the party’s Normal Carryover and by the party’s DCO-77 and DCO-91, and further increased by Carryover of Exchange Pool purchases and any temporary purchase (lease) of other water rights, and decreased by any temporary sale (lease) of their own water rights, decreased by any allocated subscriptions by such party to the Exchange Pool, or increased by any allocated requests by such party for purchase of Exchange Pool water. A portion of the Allowable Extraction calculation has been previously shown in the Table of “Water Rights Accounting” of the Watermaster’s annual report.

d. The term “Balance” is defined as the amount of a party’s “unpumped water” at the end of an Administrative Year (July 1 – June 30). It is the difference between a party’s Allowable Extraction and the amount of water the party extracted from the basin during the entirety of the Administrative Year.<sup>4</sup>

3. Calculation of DCO-91

a. DCO-91 will be calculated according to the 1991 Judgment provisions. DCO-91 is only relevant if a party has a positive “Balance” at the end of the Administrative Year. DCO-91 is calculated after the extraction records for June have been received and calculations completed, and it is applied at the beginning of the Administrative Year, that is, as of July 1. A party that sells all its APA on or before June 30 of an Administrative Year will receive no DCO-91 for the year in which it sold its full APA.

b. Production of water from the Basin will be debited in the following order: (1) Exchange Pool rights, (2) temporarily purchased (leased) rights, (3), Normal Carryover rights, (4) Allowed Pumping Allocation rights, (5) DCO-77 rights, (6) DCO-91 rights, and (7) Emergency Production rights under Judgment Section III(B)(6) agreement with WRD.

c. DCO-77 is first applied to the Balance followed by the Normal Carryover provision, which allows parties to carry over twenty percent of their APA.<sup>5</sup>

d. The Second Amended Judgment’s DCO-91 provision is next applied to the remaining Balance. DCO-91 allows a party to carryover to the next Administrative Year an additional 35 percent of its APA or 35 acre-feet, whichever is greater.

4. Watermaster will apply the DCO-91 provision whenever WRD has made a Declaration of Water Emergency during any part of an Administrative Year. Therefore, when a declaration extends beyond June 30, the DCO-91 provision will be operative during both the Administrative Year that the Water Emergency was declared and the ensuing year. But the maximum allowable DCO-91 is 35 percent of a party’s APA or 35 acre-feet (whichever is greater), at the end of the Administrative Year.

Mark Stuart, Watermaster

---

<sup>1</sup> 1991 Judgment, Part III, Subpart A, Paragraph 1 through 4:

A. *Carryover of Portion of Allowed Pumping Allocation.*

(1) *Each party adjudged to have a Total Water Right or water rights and who, during a particular Administrative year, does not extract from Central Basin a total quantity equal to such party's Allowed Pumping Allocation for the particular Administrative year, less any allocated subscriptions by such party to the Exchange Pool, or plus any allocated requests by such party for purchase of Exchange Pool water, is permitted to carry over (the "One Year Carryover") from such Administrative year the right to extract from Central Basin in the next succeeding Administrative year so much of said total quantity as it did not extract in the particular Administrative year, not to exceed 20% of such party's Allowed Pumping Allocation, or 20 acre feet, whichever of said 20% or 20 acre feet is the larger.*

(2) *Following the declaration of a Declared Water Emergency and until the Declared Water Emergency ends either by expiration or by resolution of the Board of Directors of the Central and West Basin Water Replenishment District, each party adjudged to have a Total Water Right or water rights and who, during a particular Administrative year, does not extract from Central Basin a total quantity equal to such party's Allowed Pumping Allocation for the particular Administrative year, less any allocated subscriptions by such party to the Exchange Pool, or plus any allocated requests by such party for purchase of Exchange Pool water, is permitted to carry over (the "Drought Carryover") from such Administrative year the right to extract from Central Basin so much of said total quantity as it did not extract during the period of the Declared Water Emergency, to the extent such quantity exceeds the One Year Carryover, not to exceed an additional 35% of such party's Allowed Pumping Allocation, or additional 35 acre-feet, whichever of said 35% or 35 acre-feet is the larger. Carryover amounts shall first be allocated to the One Year Carryover and any remaining carryover amount for that year shall be allocated to the Drought Carryover.*

(3) *No further amounts shall be added to the Drought Carryover following the end of the Declared Water Emergency, provided however that in the event another Declared Water Emergency is declared, additional Drought Carryover may be added, to the extent such additional Drought Carryover would not cause the total Drought Carryover to exceed the limits set forth above.*

(4) *The Drought Carryover shall be supplemental to and shall not affect any previous drought carryover acquired by a party pursuant to previous order of the court.*

<sup>2</sup> See *Water Rights Accounting* (Table 1) in the Watermaster Annual Report.

<sup>3</sup> APA includes any water rights temporarily purchased (leased) that include carryover rights (Judgment, Part V, Section 2).

<sup>4</sup> Including any In-Lieu water (see California Water Code §1005.1).

<sup>5</sup> For example, a party with an APA of 100 acre-feet that pumps 45 acre-feet during the year, would have a Balance of 55 acre-feet. In this example, the party would be credited with 20 acre-feet of Normal Carryover (20 percent of 100 acre-feet of APA), reducing the Balance from 55 acre-feet to 35 acre-feet. Then, the party would be credited with an additional 35 percent for the DCO-91 equal to 35 acre-feet (35 percent of 100 acre-feet of APA).

<sup>1</sup> See Table 6 and Table 7 for information concerning leases, transfer of water right entitlements, or prior ownership. Includes lease with flex where applicable.

<sup>2</sup> Allow able Extraction = Allow ed Pumping Allocation + Carryover + Leases

<sup>3</sup> Balance = Allow able Extraction - Amount Pumped - In Lieu

<sup>4</sup> Sold: 69.00 acre-feet from Seven-Up/RC Bottling Company of Southern California, Inc. to Aqua Capital Management LP.

<sup>5</sup> Ashland Chemical Co extracts water under a non-consumptive water use permit. See Table 5.

<sup>6</sup> Sold: 12.00 acre-feet from Union Development Co., Inc. to City of Bellflower.

<sup>7</sup> Sold: 1.00 acre-foot from CMPC Transition Corporation to Rowland Water District.
