This weekly electronic newsletter is designed to keep you current on California Water Plan news. We welcome comments, suggestions and any news tips that may be of interest to water planners.

Water Plan's assumptions and estimates now online

The draft Assumptions and Estimates Report for California Water Plan Update 2009 is [now available online](#). The report contains available data and information sources that will be

used to develop the technical information for Update 2009 — water portfolios, future scenarios, and response packages. The draft A&E Report also will be published soon as a brochure and companion CD.

Tribal Communications Committee's Dec. 12 meeting highlights posted

Meeting highlights from the Tribal Communication Committee's third meeting is available on the [Tribal Communications page](#) of the Water Plan Web site. The purpose of the committee is to develop ways, tools, and protocols for engaging tribal governments and communities in the 2009 and future California Water Plan updates. The committee also will help organize a California tribal water summit to identify statewide tribal water issues and offer solutions.

Staff will take part in modeling forum

Water Plan staff are participating in the 14th Annual Meeting of the California Water and Environmental Modeling Forum to be held Feb. 26-28 at the Asilomar Conference Center in Pacific Grove. The Water Plan session is 10 a.m. on Tuesday, Feb. 26. Complete agenda and registration information is [posted here](#).

DWR graph tracks Colorado River flows for 12 centuries

An item in last week's Water Plan E-news was about a National Geographic article that told about water data from tree rings. Veteran DWR Hydrologist Maury Roos was able to run down a copy of a graph mentioned in the article. It tracks flows on the Colorado River from 762. The graph [can be found here](#).
