This weekly electronic newsletter is designed to keep you current on California Water Plan news. We welcome comments, suggestions and any news tips that may be of interest to water planners.

## Learning more about Update 2009

Last week, DWR released Water Plan Update 2009. Today we'll bring you up to date on how best to navigate to the Water Plan.

**Readers Guide can help you navigate the Water Plan**

California Water Plan Update 2009 presents the latest statewide strategic plan for water management – a roadmap to year 2050. Use this reader's guide to navigate the many volumes that describe California's diverse water conditions and statewide and regional integrated water management. [Find the guide here.](#)

**When using the Readers Guide, try the 'Mice' for quick reference**

The Highlights booklet has a handy method for getting the most out of the Water Plan: You can click on the "Mouse" symbols at the bottom of the pages to drill in to the specifics of the Water Plan. [Go to the Highlights booklet](#) and try the "Mice."

**More Volume 2 strategies have been posted**

Since last week's publication of Water Plan Update 2009, 13 new chapters that have been added to [Volume 2, "Resource Management Strategies."](#) More are added daily and it's expected that all 27 strategies will be added to Volume 2 by the end of the week. A resource management strategy is a project, program, or policy that helps local agencies and governments manage their water and related resources.

**Sustainable Water Resources Roundtable sets 2-day meeting in Palo Alto**

The Sustainable Water Resources Roundtable will hold its next SWRR meeting on Tuesday, April 27, and Wednesday, April 28, in Palo Alto. The meeting is open to water managers with an interest in water sustainability. For more information and to register [click here.](#) This free event is expected to fill up, so please register early.

**Applications for Ag water enhancement program available online**

New applications are available under the Agricultural Water Enhancement Program (AWEP) which is the Farm Bill program that most lends itself to coordination with both Department of Water Resources' and Bureau of Reclamation's goals in project areas needing water conservation. [You can find more information here.](#)
