This weekly electronic newsletter is designed to keep you current on California Water Plan news. We welcome comments, suggestions and any news tips that may be of interest to water planners.

### RSVP for Water Plan Public Advisory Committee meeting

The Water Plan Public Advisory Committee will be meeting Wednesday, June 29, in Sacramento. A [webcast](#) of the meeting will be available, but those planning to attend in person are asked to [RSVP](#) by Monday, June 27. Other meeting details are available in the [agenda](#). There is a \$15 fee for the working lunch presentation.

### DWR proposes adoption of emergency water regulation

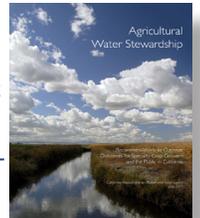

DWR is proposing adoption of an emergency agricultural water measurement [regulation](#). The proposed sections provide for a range of options that agricultural water suppliers may use to comply with the measurement requirements. More details, including instructions on submitting written comments, are available [here](#).

### Water board posts agenda for ag efficiency workshop

The [State Water Resources Control Board](#) has released the [agenda](#) for next month's workshop on agricultural water use efficiency. The workshop will be held Wednesday, July 20, in Sacramento and will focus on trends, challenges and opportunities to improve efficiency. More information is available in this [notice](#).

### Roundtable report includes recommendations for ag water security

The [California Roundtable on Water and Food Supply](#) has released a proposed set of actions to increase water security for California agriculture. [Agricultural Water Stewardship: Recommendations to Optimize Outcomes for Specialty Crop Growers and the Public in California](#) presents a set of recommendations to help state agencies and water stakeholders develop long-term solutions.

### List of FAQs made available to regional water management groups

To help regional water management groups address climate change requirements in their integrated regional water management plans, DWR has posted a list of [frequently asked questions](#) on its [climate change](#) page. Part of the information looks at what should be included in the upcoming IRWM planning grants solicitation for addressing the climate change standard.

### Second phase of Delta risk report evaluates levee scenarios

The [Delta Risk Management Strategy Phase 2](#) report is available on the DWR website. Phase 1 included an evaluation of the economic, environmental, health, and safety consequences of levee failures in the Delta. Phase 2 evaluates scenarios which could reduce those risks. An [executive summary](#) of the report is also on the website.
