

## PRELIMINARY ROSTER REGIONAL FORUM DESIGN TEAMS

A new Regional Approach is underway to support outreach and collaboration on integrated water and flood management. Regional meetings (Forums) will occur several times a year and emphasize place-based dialog. These meetings will be open to all and announced through the eNews and other venues.

This document provides an initial roster of planning members for the Forums. The planning members will provide leadership in assisting with scope of work, agenda development, organization of work groups (as appropriate) and outreach.

*This is a draft document – planning members will likely change as the process unfolds.*
