# Guiding Principles

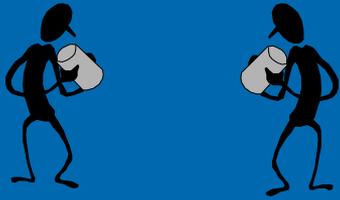

The Regional Approach is an expanded approach for regional outreach developed by DWR in cooperation with local entities and organizations, focused on integrated water management.

**DWR is committed to:**

- **Planning with more regard for regional diversity**
- **Increasing regional influence on State water policy and investment decisions**
- **Integrating DWR programs both internally and externally**
- **Working with other State agencies to coordinate related resource planning programs**

# Objectives

- Provide a venue for regional dialogue related to integrated water management and planning

- Focus on the unique conditions, objectives, and potential solutions in each region

- Better integrate and coordinate multiple planning efforts and programs at the local and regional level

# Background

Build on and learn from concept of annual regional workshops held for Update 2009

- Provide a more interactive format for regional input than in 2009
- Expand the scope over that considered in 2009
- Provide a venue for “one-stop shopping” for water-related dialogue, information, and networking
- Keep regional outreach meetings focused and efficient and specific to certain stakeholders

# Design Teams

- Small teams of up to 10 regional stakeholders (diverse representation) plus DWR staff (Brian Moniz from DWR Regional Office plus Lew Moeller and Charlie Kratzer from Headquarters)
- Meet before and after Regional Forums by conference call
- Develop agenda for Regional Forums
- Identify appropriate regional audience for each Regional Forum
- Assist with outreach to appropriate stakeholders

# Next Steps

Evaluate first Regional Forum

Refine approach as needed

Start planning for next Forum!

[Meet several times each year,  
as desired, through 3-hour  
webinars, with options for  
physical meeting space]
