

Julie:

Thanks for the opportunity to review the report. The changes put forth are long overdue. I especially support the improvements in irrigation timers, sprinkler bodies, plant labeling, CIMIS, WUCOLS, and landscaper training and certification.

Do the regulations for landscape improvement on state owned property extend to city and county owned properties? My understanding of the document seems that it does not. Perhaps those regulations should extend to other government agency owned properties

I think it is unlikely that the regulatory requirements for home inspection and regulation are unlikely to be implemented in small cities and water agencies such as ours – especially in a part of the state where many of the citizens resist any additional government regulation.

Thanks to you and all the team for your hard work on this.

Jeff – Say Hi! To all for me.
