

U4 Fourth Target Method

DWR shall develop a method for calculating urban water use targets that identify per capita use targets that cumulatively result in a statewide 20% reduction and report to the Legislature by December 31, 2010 (and update by 2014). (10608.20(b) (4))

Timeline – December 31, 2010 This method will be finalized and posted to the website.

Project Materials

The Urban Stakeholders Committee will review technical material and documents, provide comments, data, and supporting information to DWR as this method is developed.
