Chief, Water Use Efficiency Branch  
Division of Statewide Integrated Water Management  
Department of Water Resources  
901 P St.  
Sacramento, CA 95814

RE: California State University, Fresno Level of Support and Comments for Draft  
Agricultural Water Measurement Regulation

Dear Manucher

Thank you for the opportunity for the Center for Irrigation Technology to participate with both the Agricultural Stakeholders Committee (ASC) and the A2 Technical Subcommittee in development of the draft Agricultural Water Measurement Regulation during the past 8 months.

The Center for Irrigation Technology is prepared to offer the following level of support;

***General Support*** for all or most aspects of a proposal. No fundamental disagreement with key aspects of proposal. Includes having unanswered questions that need additional information or clarification.

A comment from one of our staff members, Ed Norum P.E. is attached to explain additional areas for consideration. Also see our statement in the accompanying email on “protocol” for volume measurement.

Please contact me if I can provide any more information to you.

California State University, Fresno looks forward to further proactive engagement with the Department of Water Resources in furthering integrated water management throughout the state.

Cordially,

Dr. David Zoldoske  
Director  
Center for Irrigation Technology  
California State University Fresno
