Subject: Comments on DWR's Fiscal Impact Analysis

Baryohay,

Thank you for the opportunity to comment on the Fiscal Impact Analysis. A group of Agricultural water suppliers and consultants worked together to provide the attach comments. Unfortunately, the review was not indepth, due to the limited timeframe allotted. However, as you will see in the attached letter, we did identify what appears to be errors in the calculations resulting in significant under estimates for the resulting impacts and costs.

We trust that DWR will review our comments and make the necessary modifications to the report.

If you have any problems receiving this email, or any questions regarding the letter, please do not hesitate to contact myself, or any of the individuals listed on the letter.

Sincerely,

Debbie Liebersbach
