

DWR Architectural & Engineering (A&E) Contracts Look Ahead Report

Last Updated: January 24, 2024

Division	Request for Qualification Number	Estimated Quarter of Advertisement	Estimated Contract Term	Description of Work	A&E Category/ Service Type	Estimated Contract Value
Engineering	10192125	1st Quarter 2024	5 Years	The Contractor will provide architectural and landscape architectural services for buildings and facilities involving various DWR owned or leased buildings and various SWP facilities in California, from Red Bluff to Lake Perris. The focus of the Contractor's work will be architectural services, especially tenant improvements. In addition, landscape architectural services may also be needed independently to support DWR building projects.	Architectural Services and Landscape Architectural Services	\$1,000,000 to \$5,000,000
Operations and Maintenance	10191137	Currently Advertising - SOQs due: February 6, 2024	5 Years	The Contractor will provide on-call, as needed, Construction Project Management Services (CPMS) in the areas of construction management and contract administration, inspection, and other CPMS related engineering and management services for the Fire Modernization Program at State Water Project (SWP) Facilities.	Construction Project Management Services	\$20,000,000 to \$30,000,000
Division of Engineering	10192778	Currently Advertising - SOQs due: February 16, 2024	5 to 7 Years	The Independent Cost Estimator (ICE) will prepare the independent cost estimates for DWR to use as a point of reference in negotiating the fixed price or guaranteed maximum price (Construction Proposed Price) for the Construction Manager/General Contractor construction contract. This contract will be used to provide ICE support for DWR's San Joaquin Field Division Fire Safety Modernization Project which may include several construction contracts covering either different construction phases of the overall project, different project facility locations, or a combination of both.	Construction Project Management Services - Cost Estimating	\$1,000,000 to \$5,000,000

- 1) Estimated Advertisements are subject to change as contracts are developed.
- 2) Services listed have not been confirmed to be services that can be acquired under GC§ 4525.
- 3) Send all questions regarding this report to DWR-aequestions@water.ca.gov.
- 4) Discussions with DWR staff about the contents of this report are not permitted.
- 5) All Contracts Subject to BL 23-27: <https://dof.ca.gov/wp-content/uploads/sites/352/2023/12/BL-23-27-Current-Year-Expenditure-Freeze.pdf>

DWR Architectural & Engineering (A&E) Contracts Look Ahead Report

Last Updated: January 24, 2024

Division	Request for Qualification Number	Estimated Quarter of Advertisement	Estimated Contract Term	Description of Work	A&E Category/ Service Type	Estimated Contract Value
Division of Engineering	10195411	1st Quarter 2024	3+1+1	Contractor will provide geotechnical engineering and related services on an as-needed and as-directed basis focused on canals, levees, dams, and other facilities with particular emphasis in safety. Contractor will review, evaluate, and analyze geotechnical engineering parameters; develop engineering documents; and prepare geotechnical engineering reports related to facilities owned or under the responsibility of DWR, including State Water Project (SWP) facilities. These services will also be provided for embankments and foundations related to DWR facilities. This RFQ may result in up to 3 contracts.	Geotechnical Engineering Services	\$40,000,000 to \$50,000,000
Division of Flood Management	A&E 256	1st Quarter 2024	5 years	Contractor will provide engineering, modeling, planning, environmental, and data management services to support flood emergency preparedness and response activities. Services will provide for the development of hydrometeorological observation networks used in forecasting, as well as the development of flood emergency management tools and procedures for flood response. This will include assistance with modernizing data collection and dissemination tools and decision support systems. Construction and monitoring related to the repair and replacement of hydrometeorological observation networks will be necessary. Contractor to provide the necessary environmental services to facilitate this work where needed. Contractor may perform inspection of flood system facilities and will support activities and programs to improve efficiency in data collection and dissemination for inspections. Contractor will aid in the development of emergency response plans and assist with the management of related grant programs.	Flood Maintenance and Operations Services	\$20,000,000 to \$30,000,000
