This weekly electronic newsletter is designed to keep you current on California Water Plan news. We welcome comments, suggestions and any news tips that may be of interest to water planners.

Climate change index made available for water plan update

DWR is providing an easy way to find all the places climate change is mentioned in California Water Plan Update 2009. A new online posting lists each mention of climate change in all volumes of the plan. The guide can be found [here](#), along with similar indexes for water quality and flood management.

Water policy book being released tonight by PPIC

The Public Policy Institute of California (PPIC) is set to release a book detailing a comprehensive study of California's water policy. *Managing California's Water: From Conflict to Reconciliation* will be available for download tonight, Feb. 23, at 9 p.m. on the [PPIC](#) website. The download is free. The book was written by a team of scientists, engineers, economists, and lawyers, along with representatives from three University of California campuses, and Stanford University.

Strategic Growth Council sets agenda for first meeting of the year

The Strategic Growth Council (SGC) will hold its first meeting of the year on Wednesday, March 2, in Sacramento. The SGC has been an effective multi-agency venue to coordinate state government policies, including water governance. The [agenda](#) and a link to the [online feed](#) of the meeting, are available on the SGC website.

Participants wanted for UC Davis water management survey

UC Davis is conducting a survey to collect opinions about a variety of water management issues in California. The survey should help policy stakeholders identify the most important and effective management processes currently operating in the Delta. Anyone interested in participating in the survey should contact [Mark Lubell](#) at UC Davis.

Utah conference focuses on water resource management

A chance to explore integrated water resource management from both the United States and international perspectives will be available later this year in Utah. The American Water Resources Association will hold its [Summer Specialty Conference](#) June 27-29, in Snowbird, Utah. It will include a comprehensive look at water resource management.
