**UC Davis workshop  
offers economic models  
for agricultural water use**

A workshop looking at alternatives for [modeling the economics of agricultural water use](#) will be presented next month at UC Davis. The agenda includes an introduction to mathematical programming models such as the [Statewide Agricultural Production Model](#). Drought and climate change will also be discussed. The workshop on Friday, Jan. 31, will be presented by the [California Water and Environmental Modeling Forum](#).

**IEP for the San Francisco  
Estuary heading to Folsom  
for annual workshop**

Registration will open the week of Jan. 13, for the [annual workshop](#) of the Interagency Ecological Program (IEP) for the San Francisco Estuary. The three-day workshop opens Wednesday, Feb. 26, in Folsom and will include joint sessions with the California Water and Environmental Modeling Forum.

**Deadline for submitting  
salinity forum abstracts  
is set for next week**

A little more than one week remains to [submit abstracts](#) for next year's [international salinity forum](#) in Riverside. Submissions are due Monday, Jan. 1. The forum will address issues critical to salinity management including some of the social and economic impacts. A [preliminary program](#) is available. The forum will be June 16-18.

**Science experts to present  
Delta outflow data  
at February workshop**

The Delta Science Program has scheduled a two-day workshop in advance of the State Water Boards decisions regarding Delta outflow requirements. The workshop on Feb. 10 and 11, in Sacramento, will feature presentations from an independent panel of science experts. Using the latest reports and data, they will discuss the effects of the outflows to the Delta and related ecosystems. Workshop details are available [here](#).
